PROFILE

Computer Science graduate specializing in Intelligent Computing, with strong foundations in data analytics, business intelligence, software development, and AI. Hands-on experience in data cleaning, analysis, visualization, and dashboard development using Python, Pandas, SQL, Tableau, and Excel through academic projects. Experienced in analysing datasets to identify trends, performance patterns, and actionable business insights. Strong analytical, problem-solving, and technical skills with the ability to adapt to new tools and technologies.

EDUCATION

Universiti Sains Malaysia

Bachelor of Computer Science (Intelligent Computing) (Hons.)
CGPA: 3.39

Gelugor, Penang

Oct 2022 - Jul 2026

Johor Matriculation College

Matriculation Certificate (Computer science)
CGPA: 4.00

Tangkak, Johor

Jul 2021 - May 2022

WORK EXPERIENCE

Awesome System Solution

Software Support Intern

Kempas, Johor Bahru

Mar 2025 - Sept 2025

- Provided technical support for SQL Account and SQL Payroll, troubleshooting system functionality, configuration, and usage issues for clients.
- Performed client data migration from existing accounting/payroll systems to SQL Account and SQL Payroll, including preparing and validating data using Excel templates and SQL Excel Import tools.
- Customized client reports using RTM, FastReport, Delphi, and Pascal scripting based on business and reporting requirements.
- Assisted with e-invoice configuration, system upgrades, user training, and technical troubleshooting, collaborating with the team to resolve issues and improve software usability.

PROJECTS

QuizyFy - AI-Based Quiz Generation and Learning Support System (FYP)

Technologies: Python, FastAPI, LLaMA 3.3-70B (Groq), SBERT, LangChain, Supabase (pgvector), React.js, Tailwind CSS

- Developed an AI-powered web application that generates personalized multiple-choice quizzes from uploaded lecture notes and study materials.
- Implemented intelligent learning support features that provide explanations, feedback, and relevant learning resources based on students' quiz performance.
- Designed to enhance self-learning, knowledge assessment, and exam preparation for university students.

IoT-Based Gas Leak Detection and Safety Monitoring System

Technologies: ESP32, MQTT, C++, React, Node.js, MQTT, Supabase, Google Cloud Platform, Twilio

- Developed an IoT-based smart safety system that detects gas leaks in real time, triggers automated safety responses, and provides remote monitoring through a cloud-connected dashboard with emergency alerts.

Cervical Cancer Risk Prediction

Technologies: Python, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Jupyter Notebook

- Built an ML classification pipeline using clinical data, applying feature selection and GridSearchCV to optimise KNN and Decision Tree models, achieving 96% accuracy and 100% recall with the Decision Tree classifier.

DFA-Based Stop Word Recognition System

Technologies: Python, Flask, HTML/CSS, Jinja2

- Developed a DFA-based text analysis tool that identifies and highlights specific English stop words from uploaded text files using custom automata logic, with a Flask web interface for displaying detection results.

ReFill - Medication Refill Application

Technologies: React Native, Expo, Node.js, Express.js, MySQL, JWT Authentication, Axios

- Developed a mobile healthcare application that simplifies medication refill management by enabling patients to view prescriptions, request refills, and track medication orders.
- Implemented role-based access for patients and healthcare providers, allowing different functionalities such as prescription management, medical record updates, refill processing, and inventory management.

SKILL

- **Technical skill** : JavaScript, Python, C++, R, SQL, React.js, Node.js, HTML, CSS Machine Learning, Deep Learning, NLP, RAG, Fine Tuning, PyTorch, TensorFlow, Dashboard Design, Statistical Analysis, EDA
- **Tools & Platforms** : Tableau, Git, Docker, GCP, MS Office, Figma, Blender
- **Soft skill** : Problem-Solving, Collaboration, Time Management, Analytical Thinking, Innovation
- **Language** : English (Fluent), Malay (Fluent), Tamil(Native)
